

Near Field Probe Antenna 1-35MHz 50Ω Pole mounted 02-2184-001

AT A GLANCE

1-35MHz

Return Loss >20dB

Low profile

Extremely rigid

Vertically polarised

The **Lencom**® 2184 near field probe antenna covers the complete range of 1-35MHz, with return loss of >20dB.

The 2184 is a receive-only antenna.

Designed to be used in high RF fields, the 2184 has been engineered to minimise aeolian noise.

The base incorporates a switchyard standoff insulator, and all metallic elements are stainless steel.

The mounting clamps and fasteners are also stainless steel.

Electrical

Frequency range	1-35MHz, continuous
Nominal Impedance	50Ω
Radiation Pattern	Omni directional
Polarisation	Vertical

Mechanical

Height	3m
Installation kit supplied	Two x double V clamps
Input connector	BNC
Wind rating	160km/hr, no ice
Packed dimensions and weight	18.5kg
Weight (including clamps)	16kg

Specifications subject to change without notice
