

Long Wire Antenna Kit 02-2181

AT A GLANCE

Improves antenna efficiency

Suits all Lencom mobile antennas:

02-4010

01-1004

01-1006

Complete package

Easily and quickly deployed

Complete assembly in the bag

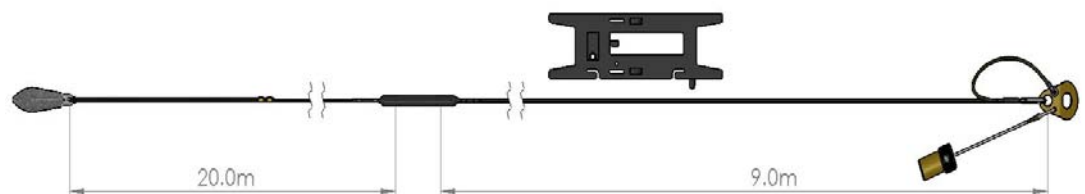

Antenna kit, as supplied

This long wire antenna kit is designed to improve efficiency of Lencom® mobile HF antennas when stationary.

It fits the 02-4010 NATO base 3m whip, the 01-1004 flange mount base and the 01-1006 single hole base.

It slips over the stud at the top of the antenna base, and is held on with the captive retainer.

It comes complete in one bag, and comprises 9m of Kevlar wire rope, 20m of UV resistant cord, a captive weight for throwing the antenna over a support structure or tree, plus a winding frame.
