

10m Tactical Mast Man-Portable 02-2165

AT A GLANCE

Extremely light

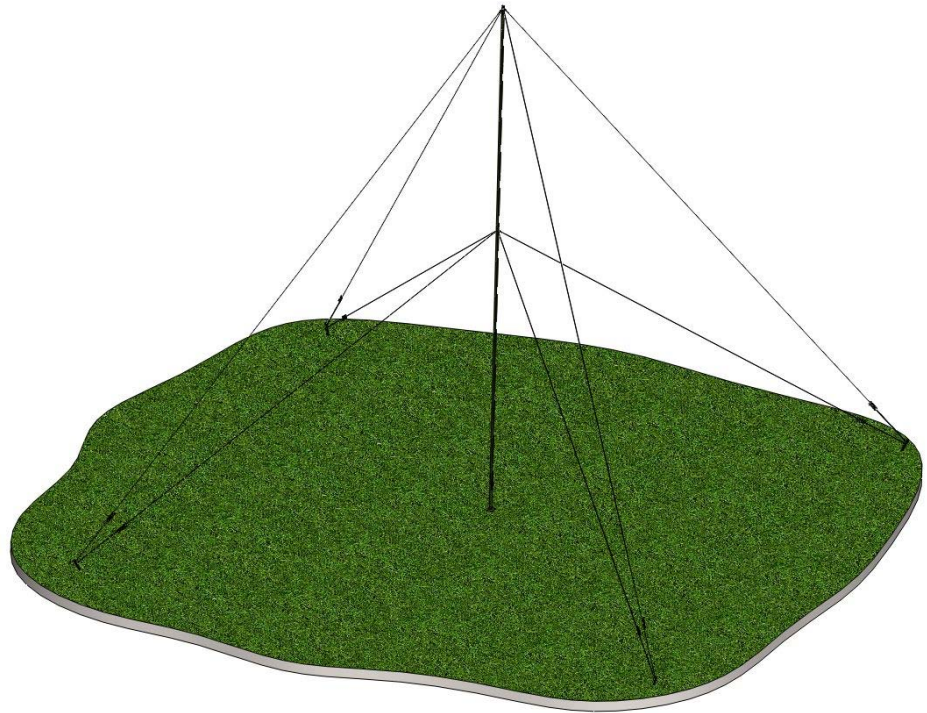

2 person erection

Rapid deployment

Short package designed
for air transport

All accessories included

Perfect for rapid
deployment needs

The **Lencom**® 2165 tactical mast was designed with rapid deployment in mind, both of the mast and an associated wire HF antenna.

This means lightweight mast sections that two people can connect and then erect.

Constructed of blackened high strength aluminium, the Lencom 2165 tactical mast comprises nine sections that simply slide together.

The mast is guyed four ways at the 5.5m and 10m levels, and a quick-connect pulley and halyard system is supplied to enable rapid and easy raising and lowering of wire antennas.

The guys are supplied already connected to the guy disks to speed installation and ensure that they cannot be lost.

Anchor pegs are supplied for the guys, and are pre-drilled to accept the guy snap hooks.

All installation hardware is supplied, packed in a rugged canvas bag for ease of transport.
